RIBOSOMES

Edited by

M. Nomura

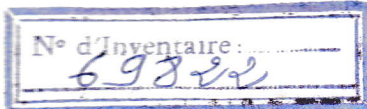

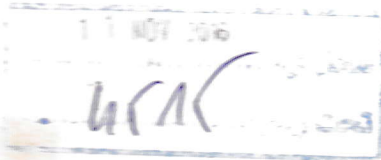

Institute for Enzyme Research
University of Wisconsin

A. Tissières

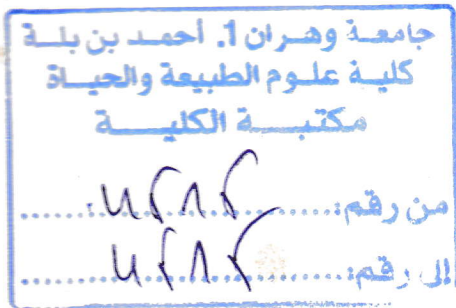

Department of Molecular Biology
University of Geneva

P. Lengyel

Departments of Molecular Biophysics and Biochemistry
Yale University

07 OCT. 1980

Cold Spring Harbor Laboratory
1974

Contents

Preface, ix

PART I General Reviews

Ribosome Research: Historical Background, 3

A Tissières

The Process of Translation: A Bird's-eye View, 13

P. Lengyel

General Physical Properties of Ribosomes, 53

K. E. Van Holde and W. E. Hill

Purification and Identification of *Escherichia coli* Ribosomal Proteins, 93

H. G. Wittmann

Chemical Structure of Bacterial Ribosomal Proteins, 115

H. G. Wittmann and B. Wittmann-Liebold

5S RNA, 141

R. Monier

Structure of the 16S and 23S Ribosomal RNAs, 169

P. Fellner

Reconstitution of Ribosomes: Studies of Ribosome Structure, Function
and Assembly, 193

M. Nomura and W. A. Held

RNA-Protein Interactions in the Ribosome, 225

R. A. Zimmermann

Protein Topography of Ribosomal Subunits from *Escherichia coli*, 271
R. R. Traut, R. L. Heimark, T-T. Sun, J. W. B. Hershey and A. Bollen

Functional Organization of the 30S Ribosomal Subunit, 309
C. G. Kurland

Genetics of Bacterial Ribosomes, 333
S. R. Jaskunas, M. Nomura and J. Davies

Regulation of Biosynthesis of Ribosomes, 369
N. O. Kjeldgaard and K. Gausing

Ribosome Formation in *Escherichia coli*, 393
D. Schlessinger

Structure and Function of Eukaryotic Ribosomes, 417
I. G. Wool and G. Stöffler

The Assembly of Ribosomes in Eukaryotes, 461
J. R. Warner

Ribosomes from Eukaryotes: Genetics, 489
R. H. Reeder

Biosynthesis of Organelle Ribosomes, 519
N-H. Chua and D. Luck

PART II Specific Reviews

Ribosome Structure as Studied by Electron Microscopy, 543
J. A. Lake, D. D. Sabatini and Y. Nonomura

Chemical Approaches to the Analysis of Ribosome Architecture, 559
G. R. Craven, B. Rigby and L-M. Changchien

Affinity Labeling Techniques for Examining Functional Sites of Ribosomes, 573
C. R. Cantor, M. Pellegrini and H. Oen

Fluorescence Spectroscopic Approaches to the Study of Three-dimensional Structure of Ribosomes, 587
C. R. Cantor, K. Huang and R. Fairclough

Neutron Scattering Studies of the *E. coli* Ribosome, 601
P. B. Moore, D. M. Engelman and B. P. Schoenborn

Structure and Function of the *Escherichia coli* Ribosome: Immunochemical Analysis, 615
G. Stöffler

- Ribosome Genetics Revealed by Hybrid Bacteria, 669
P. S. Sypherd and S. Osawa
- The Ribosome Cycle, 679
R. Kaempfer
- Alternative Views on the Ribosome Cycle, 705
B. D. Davis
- The Ribosomal Components Involved in EF-G and EF-Tu-dependent GTP Hydrolysis, 711
W. Möller
- Cellular Regulation of Guanosine Tetraphosphate and Guanosine Pentaphosphate, 733
M. Cashel and J. Gallant
- In Vitro Synthesis of ppGpp and pppGpp, 747
R. Block and W. A. Haseltine
- Ribosomal RNA Synthesis In Vitro, 763
A. Travers
- Complex Interactions of Antibiotics with the Ribosome, 771
B. D. Davis, P-C. Tai and B. J. Wallace
- Streptomycin and Misreading of the Genetic Code, 791
L. Gorini
- Effects of Colicin E3 on Bacterial Ribosomes, 805
M. Nomura, J. Sidikaro, K. Jakes and N. Zinder
- Yeast Ribosomes: Genetics, 815
C. S. McLaughlin
- Progress in the Structural Analysis of Mammalian 45S and Ribosomal RNA, 829
B. E. H. Maden, M. Salim and J. S. Robertson
- Differential Replication of Ribosomal RNA Genes in Eukaryotes, 841
B. B. Spear
- Phosphorylation of Ribosomal Proteins in Eukaryotes, 855
A. Krystosek, L. F. Bitte, M. L. Cawthon and D. Kabat
- How Transfer RNA May Move Inside the Ribosome, 871
A. Rich
- Reference Index, 885
Subject Index, 911
