PART I: STRUCTURE OF FLAVOPROTEINS

<i>Chapter 1.</i>	Structure and Catalytic Cycle of the Flavoenzyme Glutathione Reductase E.F. Pai and G.E. Schulz	3
<i>Chapter 2.</i>	The Structure of p-Hydroxybenzoate Hydroxylase R.K. Wierenga, K.H. Kalk, J.M. van der Laan, J. Drenth, J. Hofsteenge, W.J. Weifer, P.A. Jekel, J.J. Beintema, F. Müller, and W.J.H. van Berkel	11
<i>Chapter 3.</i>	Comparisons of Flavodoxin Structures M. Ludwig, K.A. Patridge, W.W. Smith, L.H. Jensen, and K.D. Watenpaugh	19
<i>Chapter 4.</i>	The Structure of Ferredoxin NADP Oxidoreductase: A Progress Report P.A. Karplus and J.R. Herriott	28
<i>Chapter 5.</i>	Structural Studies on Glycolate Oxidase from Spinach Y. Lindqvist and C.I. Brändén	32
<i>Chapter 6.</i>	Preliminary X-Ray Diffraction Studies of Crystals of Lactate Oxidase from <i>Mycobacterium smegmatis</i> W.C. Stallings, K.A. Patridge, M.L. Ludwig, V. Massey, and Y.S. Choong	36
<i>Chapter 7.</i>	The Complete Primary Structure of Glutathione Reductase from Human Erythrocytes R. Untucht-Grau, R. Blatterspiel, R.L. Krauth-Siegel, M. Saleh, E. Schiltz, R.H. Schirmer, and B. Wittmann-Liebold	38
<i>Chapter 8.</i>	Pig Heart Lipoamide Dehydrogenase and Human Erythrocyte Glutathione Reductase—Homology in Each of the Three Domains L.D. Arscott, C.H. Williams, Jr. and G.E. Schulz	44
<i>Chapter 9.</i>	Role of Arginine Residues in the Catalytic Function of Glutathione Reductase V. Boggaram and B. Mannervik	49
<i>Chapter 10.</i>	Reaction of 2,4,6-Trinitrobenzenesulfonate with the Active Site of Glutathione Reductase I. Carlberg and B. Mannervik	53

<i>Chapter 11.</i>	Evidence for an Essential Histidine Residue at the Active-Site of Lipoamide Dehydrogenase from the Pyruvate Dehydrogenase Multienzyme Complex of <i>Escherichia coli</i>	57
	S.R. Adamson and K.J. Stevenson	
<i>Chapter 12.</i>	Modification of Lipoamide Dehydrogenase and the Pyruvate Dehydrogenase Complex of <i>Azotobacter vinelandii</i> with Maleimides	61
	A. de Kok, A.J.W.G. Visser, and A.C. de Graaf-Hess	
<i>Chapter 13.</i>	The Complete Amino Acid Sequence of D-Amino Acid Oxidase From Pig Kidney	66
	S. Ronchi, M. Galliano, L. Minchiotti, B. Curti, R.P. Swenson, C.H. Williams, Jr., and V. Massey	
<i>Chapter 14.</i>	D-Amino Acid Oxidase: Predictions on the Secondary Structure and Comparisons with Other Flavoproteins	73
	R.P. Swenson, C.H. Williams, Jr., V. Massey, S. Ronchi, L. Minchiotti, M. Galliano, M. Bolognesi, and B. Curti	
<i>Chapter 15.</i>	Multiple Conformational States of L-Amino Acid Oxidase	78
	D. Wellner and L.A. Lichtenberg	
<i>Chapter 16.</i>	Artificial Flavins as Active Site Probes of Flavoproteins	83
	V. Massey and P. Hemmerich	
<i>Chapter 17.</i>	2-Thioflavins as Active Site Probes of Flavoproteins	97
	A. Claiborne, V. Massey, and L.M. Schopfer	
<i>Chapter 18.</i>	Active Site Probes of Flavoproteins: Determination of the Solvent Accessibility of the Flavin 8-position for a Series of Flavoproteins	102
	L.M. Schopfer, V. Massey, and Al Claiborne	
<i>Chapter 19.</i>	Reconstitution of Liver NADH Cytochrome b_5 Reductase and of <i>Desulfovibrio vulgaris</i> Flavodoxin with 1-Deazaflavin	106
	D. Pompon, B. Guiard, and F. Lederer	
<i>Chapter 20.</i>	Physical and Chemical Studies on the FMN and Non-Flavin Phosphate Residues in <i>Azotobacter</i> Flavodoxin	111
	D.E. Edmondson and T.L. James	
 <i>PART II: REACTION MECHANISMS</i>		
<i>Chapter 21.</i>	Scope of Chemical Redox Transformations Catalyzed by Flavoenzymes	121
	C. Walsh	
<i>Chapter 22.</i>	Dehydrogenation Mechanisms in Flavoprotein Catalysis	133
	S. Ghisla	

A. Carbon-Sulfur Transhydrogenases	
<i>Chapter 23.</i>	Mechanisms of GSSG and Oxygen Reduction Catalyzed by Glutathione Reductase B. Mannervik, V. Boggaram, and I. Carlberg
	145
<i>Chapter 24.</i>	Multifunctionality of Lipoamide Dehydrogenase C.S. Tsai, D.M. Templeton, A.J. Wand, and J.R.P. Godin
	149
<i>Chapter 25.</i>	Proton Stoichiometry of the Reduction of FAD and the Disulfide of Thioredoxin Reductase. Oxidation Reduction Potentials as a Function of pH. FAD Replacement by 1-deaza FAD M.E. O'Donnell and C.H. Williams, Jr.
	153
B. Carbon-Carbon Transhydrogenases	
<i>Chapter 26.</i>	Purification and Properties of Methylenetetrahydrofolate Reductase from Pig liver S.C. Daubner and R.G. Matthews
	165
C. Dehydrogenase-Oxidase Flavoproteins	
<i>Chapter 27.</i>	Thermodynamic Studies on the Self-Associating System of D-Amino Acid Oxidase H. Tojo, K. Horiike, K. Shiga, Y. Nishina, R. Miura, H. Watari, and T. Yamano
	175
<i>Chapter 28.</i>	Resonance Raman Study on the Reaction Intermediates of D-Amino Acid Oxidase R. Miura, Y. Nishina, K. Shiga, H. Tojo, H. Watari, Y. Miyake, and T. Yamano
	179
<i>Chapter 29.</i>	Utilization of D- and L-Thiazolidine-2-Carboxylic Acids as Substrates for D-Amino Acid Oxidase P.F. Fitzpatrick and V. Massey
	184
<i>Chapter 30.</i>	A New Material for Flavoprotein Research. Purification and Properties of Hog Kidney Quasi D-Amino Acid Oxidase K. Shiga, Y. Nishina, K. Horiike, H. Tojo, H. Watari, and T. Yamano
	188
<i>Chapter 31.</i>	Suicide Inactivation of the Flavoenzyme Alcohol Oxidase by Cyclopropanone T.H. Cromartie
	192
<i>Chapter 32.</i>	Microbial Oxidation of Methanol: Properties of Crystallized Alcohol Oxidase from <i>Pichia sp.</i> R.N. Patel, C.T. Hou, A.I. Laskin, and P. Derelanko
	196
<i>Chapter 33.</i>	Fluorescent Substrates and Probes of the Catalytic Binding Site of Pyridoxine-5-P Oxidase C. Wu, K. Jones, and J.E. Churchich
	202
