

METHODS IN PEPTIDE AND PROTEIN SEQUENCE ANALYSIS

CHR. BIRR
EDITOR

ELSEVIER / NORTH-HOLLAND

CONTENTS

Preface	V
Acknowledgement	VII
List of Participants	IX
Memoriam to J.I. Harris	1
PROGRESS IN SOLID PHASE EDMAN DEGRADATION	
Comparison of methods and supports for immobilization of peptides and proteins for solid-phase Edman degradation R.A. Laursen, R. Obar, F. Chin, K. Whitrock	9
Cleavage of TRP-, TYR- and HIS-bonds suited for attachment to amino-supports and subsequent Edman degradation E. Wachter, R. Werhahn	21
Fully automated solid phase sequencing with on-line identification of PTHs by high pressure liquid chromatography W. Machleidt, H. Hofner	35
New approaches to sequencing by micro- and automatic solid phase technique B. Wittman-Liebold, A. Lehmann	49
Insoluble cardoimides as supports in peptide and protein sequence analysis M.J. Horn, A.G. Bonner	73
Peptide attachment to (1-bromo-2-oxoethyl-) polystyrene supports and degradation experiences Chr. Birr, C. Ximenez, R. Pipkorn, I. Werner	83
Solid-phase sequencing in spinning cup sequenators. II: Micromethods for the purification and sequence analysis of proteins and peptides D.A. Powers, J.C. Fishbein, A.R. Place, W. Sofer	89
MICROSEQUENCING STRATEGIES	
Aspects on automated and microscale sequencing A. Henschen-Edman, F. Lottspeich	105
Micro-sequence analysis of polypeptide using dimethylaminoazobenzene-isothiocyanate J.Y. Chang	115
Automated sequence analysis of proteins: An overview H.D. Niall	123

The use of radioactively labeled N- and C-termini in protein sequence analysis H-H. Kiltz	131
Recent developments in microsequence analyses of intrinsically radio-labeled proteins D.J. McKean	143
The use of theed as a non-volatile buffer in microsequencing G.S. Begg	153
AUXILIARY METHODS IN PROTEIN SEQUENCE DETERMINATIONS	
Liquid sequencer and peptide sequence analysis: The use of protein carrier H. Rochat	159
Comparison of solid-phase and spinning cup methodologies III: Experiences with polybrene, A. 1 M quadrol program, and a modestly modified automated spinning cup sequencer L.J. McCumber, M. Qadeer, J.D. Capra	165
Application of mass spectrometry in protein and peptide sequencing E. Nebelin	173
APPROACHES TO THE ELUCIDATION OF INDIVIDUAL PRIMARY STRUCTURES	
Structural studies on yeast aspartyl-tRNA synthetase: A comparison with other synthetases containing repeated sequences S. Potier, P. Walter, J. Reinbolt, Y. Boulanger	187
Microsequence analysis of lactose permease of <i>Escherichia coli</i> K. Beyreuther, R. Ehring	199
Sequence and proposed structure of a 17,000 Dalton fragment of myosin M. Elzinga, B. Trus	213
Approaches to the sequence of tubulin H. Ponstingl, E. Krauhs, M. Little, T. Kempf, R. Hofer-Warbinek	225
METHODS OF MOLECULAR BIOLOGY	
Correlation between protein and DNA analysis: Structure of the adenovirus hexon protein H. Jörnvall, G. Akusjärvi, P. Aleström, U. Pettersson, H. von Bahr-Lindström, E. Appella, A. Fowler, A. Bothwell, L. Philipson	237
The use of antibodies in protein structure determination A.V. Fowler, F. Celada, J. Welply, I. Zabin	247
Protein sequence analysis as an aid to rapid DNA sequencing. The mammalian mitochondrion J.E. Walker, A.D. Auffret, A.F. Carne, M.A. Naughton, M.J. Runswick	257

Identification of peptides in electron density maps of proteins: Sequencing strategies for proteins of known crystal structure R.H. Schirmer, E.F. Pai, E. Schiltz, G.E. Schulz, R. Untucht-Grau	267
UTILIZATION OF PROTEIN FUNCTIONAL GROUPS	
Covalent C-terminal fixation of cyanogen bromide peptides for sequencing in the liquid phase sequenator J. Pflutschinger, G. Braunitzer	287
End-group determination of peptides with fluorescamine or O-phthalal- dehyde (OPA) E. Mendez, R. Marco	295
Advances in the chemical cleavage of tryptophanyl peptide bonds A. Fontana, W.E. Savige, M. Zamboni	309
Selective cleavage of tryptophanyl bonds with <u>o</u> -iodosobenzoic acid W.C. Mahoney, M.A. Hermodson	323
Cleavage of proteins at aspartic acid residues using dilute acid A. Inglis, N. McKern, C. Roxburgh, P. Strike	329
A further look at the amidination of protein amino groups R.N. Perham, E. Appella, G.C. Dubois, J.K. Inman	345
Sulfonation of peptides: Chemical and biological interest A. Previero, M-A. Coletti-Previero, G. Rondouin	349
Solid phase C-terminal sequencing by carboxypeptidases A. Tsugita, R. van den Broek	359
IDENTIFICATION AND ISOLATION OF PEPTIDES AND PTH AMINO ACIDS	
Methods for the identification and isolation of carboxyl-terminal peptides from proteins P.A. Hargrave, S-L. Fong, F. Wold, M. Kochman	373
A method for selective isolation of S-carboxymethyl containing peptides using diagonal paper electrophoresis J. Vandekerckhove	383
Strategy of thiol protein sequence analysis Ts.A. Egorov, M.I. Shakhparonov	395
Automated fluorogenic detection of peptide effluents in preparative ion exchange chromatography with volatile buffers J. Salnikow	407
High pressure liquid chromatography of polar and hydrophobic peptides of cytochromes from microsomal membranes J. Ozols, F.S. Heinemann, C. Gerard	417

OPEN FORUM COMMUNICATIONS

- The protein superfamily of b_5 -like cytochromes or, how to obtain three dimensional information without recourse to actual X-ray studies
F. Lederer, B. Guiard 433
- Porous glass-immobilized peptides. Chemical modification and enzymatic cleavage tailored for subsequent Edman degradation
G. Rückl, E. Wachter 439
- Use of radioisotopes in the structural study of RNA polymerase from *E. coli*
V.M. Lipkin, N.N. Modyanov, T.V. Marchenko, O.Yu. Chertov, Yu.A. Ovchinnikov 453
- The primary structure of ribosomal protein L3 from *Escherichia coli*
T.A. Muranova, A.V. Muranov, L.F. Markova, Yu.A. Ovchinnikov 459
- Complete amino-acid sequence of the alpha chain of the major hemoglobin component of the axolotl (*Ambystoma mexicanum*)
J.-P. Boissel, H. Wajcman, D. Labie 467
- Using of high performance liquid chromatography and mass spectrometry of ITH amino acids for sequence analysis of proteins
I.V. Nasimov, N.B. Levina, V.V. Shemyakin, B.V. Rosynov, I.A. Bogdanova, V.G. Merimson 475
- A microprocessor based controller for the protein sequencer
G.S. Begg 485
- The use of dabsco in automatic sequencing and dabth identification by HPLC
K.J. Wilson, G.J. Hughes 491
- An isocratic liquid chromatographic analysis of all the common PTH-amino acids
J. van Beeumen, J. van Damme, P. Tempst, J. de Ley 503
- Detection of PTH-aminoacids on thin layer plates and polyamide sheets using a UV reflexion scanner
K. Strohmaier 507
- Avoiding difficult peptide purifications by generating new amino termini in the spinning-cup sequencer
A. Boosman 513
- An improved procedure of protein elution from SDS gels suitable for automated sequence analysis
A.S. Bhowm, J.E. Mole, F. Hunter, J.C. Bennett 517
