

MEDICAL CYTOGENETICS

edited by

Hon Fong L. Mark

about the book . . .

"...a very **unique resource**. Currently, there is no cytogenetics book that is targeted for pathologists....this book will fill this void." —**Julius M. Cruse**, *Editor-in-Chief, Experimental and Molecular Pathology, Professor of Pathology, Director of Immunopathology and Transplantation Immunology, Department of Pathology, School of Medicine, The University of Mississippi Medical Center, Jackson*

"Because of its breadth, clarity, and state-of-the-art message, this volume will serve as an **excellent resource** both for experienced medical cytogeneticists and trainees new to the discipline....**highly recommended**." —**Sudarshan K. Malhotra**, *Professor Emeritus of Biological Sciences, University of Alberta, Canada*, and **Theodor K. Shnitka**, *Professor Emeritus of Pathology, University of Alberta, Canada*

"...**excellent**, impressive, long overdue, concise, and comprehensive....a **highly recommended** addition to institutional and personal libraries." —**Ernest M. Walker, Jr.**, *Department of Pathology, Marshall University School of Medicine, Huntington, West Virginia*

The only monograph on cytogenetics for the pathologist, this up-to-the-minute **reference/text** contains the most up-to-date research findings on many important topics in medical genetics—notably FISH (fluorescent in situ hybridization)-based molecular cytogenetic technologies and spectral karyotyping.

about the editor . . .

HON FONG L. MARK is President of KRAM Corporation, Barrington, Rhode Island; Director, Human Genetics, Rhode Island Department of Health, Providence; and Clinical Professor of Pathology and Laboratory Medicine at Brown University School of Medicine, Providence. She was the Director of Cytogenetics at the Lifespan Academic Medical Center of Rhode Island Hospital, Providence, until the center's closing in 1999. A leading authority on the molecular cytogenetics of breast cancer, she is the author or coauthor of over 100 articles and over 300 abstracts, posters, and platform presentations. A Fellow of the American College of Medical Genetics and a member of the American Society of Human Genetics, she serves on the Steering Committee of the New England Regional Genetics Group (NERGG) and the Coordinating Committee of the Rhode Island Genetics Task Force. A Chief Inspector for the College of American Pathologists' Laboratory Accreditation Program, Dr. Mark has served as chair of many organizations, committees, and scientific sessions, including the Cancer Genetics Committee and Grant Review Committee of NERGG, the Health Committee of the Rhode Island Commission on Women, and the International Panel of the American Association of University Women (AAUW) Educational Foundation. She is also a scientific grant reviewer for numerous regional, national, and international funding agencies, and serves on the editorial boards of several journals, including *Cancer Genetics and Cytogenetics*. Her research photographs have appeared on the covers of several scientific journals and the literature of commercial companies that market molecular cytogenetic products. She received the A.B. degree in biology and the Ph.D. degree in genetics from Brown University, Providence, Rhode Island.

Contents

<i>Foreword</i> (Thaddeus E. Kelly)	v
<i>Preface</i>	vii
<i>Contributors</i>	xv
1 Cytogenetics as a Specialty of Medical Genetics <i>Hon Fong L. Mark and Reed E. Pyeritz</i>	1
2 The Normal Human Chromosome Complement <i>Hon Fong L. Mark and Yvonne Mark</i>	21
3 Human Cytogenetic Nomenclature <i>Sugandhi A. Tharapel and Avirachan T. Tharapel</i>	49
4 Culture and Harvest of Tissues for Chromosome Analysis <i>Hon Fong L. Mark and Sandra R. Wolman</i>	91
5 Staining and Banding Techniques for Conventional Cytogenetic Studies <i>Hon Fong L. Mark</i>	121
6 Fluorescent In Situ Hybridization (FISH): Principles and Methodology <i>Jan K. Blancato and Bassem R. Haddad</i>	141
7 Cytogenetics in Medicine <i>Bruce R. Korf and Nancy R. Schneider</i>	165
8 Prenatal Chromosome Diagnosis <i>Allen N. Lamb and Wayne A. Miller</i>	191
	xiii

9	Cytogenetics of Reproductive Wastage: From Conception to Birth <i>Dorothy Warburton</i>	213
10	Cytogenetics of Male Infertility <i>Hon Fong L. Mark and Mark Sigman</i>	247
11	Recurring Cytogenetic Abnormalities in the Myeloid Hematopoietic Disorders <i>John Anastasi and Diane Roulston</i>	275
12	Cytogenetics of Lymphoid Neoplasias <i>Susana C. Raimondi</i>	349
13	Chromosome Abnormalities in Solid Tumors: An Overview <i>Avery A. Sandberg and Zhong Chen</i>	413
14	Chromosome Instability and Fragile Sites <i>Herman E. Wyandt, Vijay S. Tonk, and Roger V. Lebo</i>	437
15	Cytogenetics of Breast Cancer <i>Sandra R. Wolman</i>	511
16	Cytogenetics in Transfusion Medicine <i>Carolyn Te Young and Hon Fong L. Mark</i>	537
• 17	Fluorescent In Situ Hybridization (FISH): Applications for Clinical Cytogenetics Laboratories <i>Hon Fong L. Mark</i>	553
• 18	Evolving Molecular Cytogenetic Technologies <i>Gabriela Adelt Green, Evelin Schröck, Kerstin Heselmeyer-Haddad, Tim Veldman, Hsed M. Padilla-Nash, and Thomas Ried</i>	579
19	Preanalytical Variables in Cytogenetic Studies <i>Jila Khorsand</i>	593
• 20	Setting the Standards for Cytogenetic Laboratories <i>Gerald A. Hoeltge</i>	607
	<i>Afterword (Avery A. Sandberg)</i>	621
	<i>Questions</i>	625
	<i>Index</i>	643
