

Gene Amplification and Analysis

Volume 2
Structural Analysis of Nucleic Acids

Editors
Jack G. Chirikjian and Takis S. Papas

ELSEVIER/NORTH-HOLLAND

Contents

PREFACE	xv
CONTRIBUTORS	xvii
Chapter 1	
ENZYMATIC SYNTHESIS OF DUPLEX DNA BY AVIAN MYELOBLASTOSIS VIRAL REVERSE TRANSCRIPTASE	
Takis S. Papas, Robert A. Schulz and Jack G. Chirikjian	
I. Introduction	2
II. Purification of AMV Reverse Transcriptase	2
III. Experimental Procedures	3
IV. Synthesis of Linear Duplex DNA	7
V. Conclusions	14
Chapter 2	
<u>E. COLI</u> DNA POLYMERASE I: ENZYMATIC FUNCTIONS AND THEIR APPLICATION IN POLYMER FORMATION, NICK TRANSLATION, AND DNA SEQUENCING	
Christopher P. Hartman and Dietmar Rabussay	
I. Introduction	18
II. Properties of <u>E. Coli</u> DNA Polymerase I	18
III. Functional Applications	24
IV. Discussion and Conclusions	30
V. Appendix: Detailed Experimental Procedures	34

Chapter 3

THE USE OF TERMINAL TRANSFERASE FOR ANALYSIS OF NUCLEIC ACID STRUCTURE AND MOLECULAR CLONING

Ranajit Roychoudhury

I. Introduction	42
II. End Group Labeling of Oligonucleotides	43
III. Synthesis of Specific Primers	50
IV. Application of Ribonucleotide Terminated Primer Extension for Analytic Purposes	54
V. Sequence Analysis of Oligonucleotides	62
VI. Labeling of Duplex DNA Fragments	64
VII. Sequence Analysis of DNA	68
VIII. Use in Molecular Cloning	71
IX. Conclusions	79

Chapter 4

RESTRICTION ENDONUCLEASES: SPECIFICITIES, DIVERSITIES AND COMPUTER ANALYSIS

Robert W. Blakesley

I. Introduction	85
II. Table I: DNA Cleavage Frequency for Restriction Endonucleases with Known Recognition Sequences	89
III. Table II: DNA Cleavage Frequency for Restriction Endonucleases with Undetermined Recognition Sequences	93
IV. Table III: Microorganisms as Sources for Restriction Endonucleases	95
V. Table IV: Reaction Conditions for Certain Restriction Endonucleases	110
VI. Table V: Sequence Frequencies in ϕ X174, SV40 and pBR322 DNAs	114
VII. Table VI: Restriction Endonuclease Site Combinations for Ligation	121

Chapter 5

LAMBDA EXONUCLEASE

John W. Little

I. Introduction	136
II. Modifications of Published Purification Procedures	136
III. Catalytic Properties	139
IV. Use as a Reagent	141
V. References	144

Chapter 6

EXONUCLEASE VII OF E. COLI

John W. Chase and Lynne D. Vales

I. Introduction	148
II. Enzymology of Exonuclease VII	148
III. Genetics of Exonuclease VII	153
IV. <u>In Vivo</u> Function of Exonuclease VII	155
V. Assay and Purification of Exonuclease VII	157
VI. Applications of Exonuclease VII to the Analysis of Nucleic Acid Structure	161

Chapter 7

THE EXTRACELLULAR NUCLEASE FROM ALTEROMONAS ESPEJIANA: AN ENZYME HIGHLY SPECIFIC FOR NONDUPLEX STRUCTURE IN NOMINALLY DUPLEX DNAs

Horace B. Gray, Jr., Thomas P. Winston, James L. Hodnett, Randy J. Legerski, David W. Nees, Chik-Fong Wei, and Donald L. Robberson

I. Introduction	170
II. Nucleic Acids Containing Sites or Regions of Nonduplex or Altered Helical Structure as Substrates for Nuclease	171
III. Some Physical Properties of Partially Purified Preparations	183
IV. Dependence of Catalytic Behavior on pH, Temperature, and Solvent Composition	184
V. Kinetic Parameters and Mechanistic Aspects of Activities against Single-Stranded and Linear Duplex DNA	192
VI. Purification of <u>Alteromonas</u> Nuclease	193
VII. Detection of Altered Helical Structure in Nonsupercoiled Closed Circular DNA	199
VIII. Controlled Size Reduction of Linear Duplex DNAs through Terminally Directed Hydrolysis	200

Chapter 8

S₁ NUCLEASE OF ASPERGILLUS ORYZAE

George W. Rushizky

I. Purification	206
II. Physical Properties	207
III. Catalytic Properties	207
IV. Specificity and Applications	208
V. References	212
