

**MTP International
Review of Science**

**Biochemistry of
Cell Walls and Membranes**

**Biochemistry
Series One
Volume 2**

Consultant Editors

H L Kornberg FRS

D C Phillips FRS

Volume Editor

C F Fox

**Butterworths
University Park Press**

Contents

Biochemistry of endocytosis E. D. Korn, <i>National Heart and Lung Institute, Bethesda, Maryland</i>	1
The ion selectivity of carrier molecules, membranes and enzymes G. Eisenman and S. J. Krasne, <i>U.C.L.A. School of Medicine, Los Angeles</i>	27
Membranes of transformed mammalian cells R. O. Brady and P. H. Fishman, <i>National Institute of Neurological Diseases and Stroke, Bethesda, Maryland</i>	61
Mobility of membrane components F. Podo and J. K. Blasie, <i>University of Pennsylvania</i>	97
Molecular orientation of proteins in membranes V. T. Marchesi, <i>Yale University</i>	123
Role of the surface in production of new cells A. B. Pardee and E. Rozengurt, <i>Princeton University</i>	155
Membranes in nerve impulse conduction C. W. Cotman and W. B. Levy, <i>University of California, Irvine</i>	187
The actions of penicillin and other antibiotics on bacterial cell wall synthesis J. L. Strominger, <i>Harvard University</i>	207
Turnover of membrane proteins in animal tissues R. T. Schimke, <i>Stanford University</i>	229
Membrane transport W. Epstein, <i>University of Chicago</i>	249
Phase transitions in model systems and membranes C. F. Fox, <i>University of California, Los Angeles</i>	279
Index	307
