

THE BIOCHEMISTRY OF ANIMAL DEVELOPMENT

Edited by Rudolf Weber

Volume III

*Molecular Aspects of
Animal Development*

CONTENTS

<i>Contributors to Volume III</i>	ix
<i>Preface</i>	xi
<i>Contents of Previous Volumes</i>	xiii

CHAPTER 1

Molecular Events during Oocyte Maturation

L. DENNIS SMITH

I. Introduction	1
II. The Induction of Maturation	3
III. Morphological Events of Maturation and Their Relationship to Early Development	5
IV. Macromolecular Synthesis during Maturation	13
V. Characterization of Hormone-Oocyte Interactions in the Induction of Maturation	27
VI. Concluding Comments	40
References	42

CHAPTER 2

Transcriptional Patterns in Early Mammalian Development

GILBERT A. SCHULTZ AND ROBERT B. CHURCH

I. General Introduction	48
II. Onset of Gene Activity in Preimplantation Mammalian Embryos	50
III. RNA Containing Poly(A) Sequences in Preimplantation Rabbit Embryos	56
IV. Complexity of Transcription in Developing Mammals	62
V. Mechanisms of Transcriptional Control	77
VI. Relationship of Transcriptional Changes to the General Biochemistry of the Preimplantation Embryo	81
VII. Concluding Remarks	85
References	86

CHAPTER 3

Occurrence and Developmental Significance of Gene Amplification

HEINZ TOBLER

I. Introduction	91
II. Gene Amplification versus Gene Reiteration	97
III. Occurrence of Gene Amplification	100

IV. Visualization of Gene Amplification	124
V. Possible Mechanisms of Gene Amplification	127
VI. Theories on Developmental Significance	134
VII. Summary and Concluding Remarks	135
References	136

CHAPTER 4

The Injection of RNA into Living Cells: The Use of Frog Oocytes for the Assay of mRNA and the Study of the Control of Gene Expression

CHARLES DANIEL LANE AND JOHN KNOWLAND

I. Introduction	145
II. The Translation and Assay of mRNA's	147
III. Quantitative Studies: The Efficiency of Translation of Injected mRNA	158
IV. The Fidelity of Translation of Injected mRNA's	163
V. The Specificity of the Translational Machinery of the Oocyte	163
VI. The Post-Translational Modification of Messenger Products	171
VII. mRNA Injection as a Means for Analyzing the Translational Systems of the Living Cell	174
VIII. Translation of mRNA-Precursor Molecules	177
References	179

CHAPTER 5

Post-Transcriptional Control of Protein Synthesis

BRIGID L. M. HOGAN

I. Introduction	183
II. Evidence for Translational Control of Protein Synthesis in Bacteria	187
III. Evidence for Post-Transcriptional Control of Protein Synthesis in Animal Cells	191
IV. Concluding Remarks	210
References	212

CHAPTER 6

The Control of Isoenzyme Patterns in Development

HANS M. EPPENBERGER

I. Introduction	217
II. Isoenzyme Biochemistry: A General Introduction	218
III. Isoenzyme Distribution	226
IV. Mechanisms of Control of Isoenzyme Expression during Development ..	238
V. Concluding Remarks	250
References	251

CHAPTER 7

Substances with Morphogenetic Activity in Differentiation of Vertebrates

HEINZ TIEDEMANN

I. Introduction	258
II. Determination, Differentiation, and Competence	258
III. Evidence for the Existence of Special Morphogenetic Factors	260
IV. Chemical Properties, Biological Activity, and Mechanism of Action of Morphogenetic Substances Effective in Early Embryogenesis	262
V. Induction and Determination in Normogenesis of Amphibian Embryos	275
VI. Stimulation of Hematopoiesis	280
VII. Nerve Growth Stimulating and Epithelial Growth Stimulating Factors ..	284
VIII. Concluding Remarks	286
References	287

CHAPTER 8

Protein Nutrition in Growth Regulation during Early Development

NORMAN W. KLEIN

I. Introduction	293
II. The Requirement of Embryos for Nutrient Protein	295
III. The Requirement of Embryos for Specific Nutrient Proteins	303
IV. Nutrient Protein Complementation	309
V. Quantitative Analysis of Protein Utilization	319
VI. Protein Deprivation during Early Development	325
References	333

CHAPTER 9

Mitochondrial Differentiation during Animal Development

E. J. BOELL AND P. C. GREENFIELD

I. Introduction	337
II. Structure of Mitochondria	339
III. Enzyme Content of Mitochondria	342
IV. Mitochondrial Differentiation	345
V. Concluding Statement	378
References	379

CHAPTER 10

Occurrence and Possible Functions of Mitochondrial DNA in Animal Development

DIETHER NEUBERT, CHARLES T. GREGG, ROLF BASS,
AND HANS-JOACHIM MERKER

I. Introduction	388
II. Cytoplasmic DNA	389

III. Replication and Stability of mt DNA	401
IV. Transcription of mt DNA	411
V. Mitochondrial Protein Synthesis	421
VI. The Possible Results of Interfering with the Mammalian Mitochondrial Genome	445
VII. Concluding Remarks	453
References	455
 AUTHOR INDEX	 465
INDEX TO GENUS AND SPECIES NAMES	489
SUBJECT INDEX	491
