

BIOCH-05-49/1

INTRODUCTION TO MODERN BIOCHEMISTRY

— SECOND EDITION —

by

P. KARLSON

*Institute of Physiological Chemistry
University of Marburg
Marburg/Lahn, Germany*

translated by

Charles H. Doering

*John Collins Warren Laboratories
of the Huntington Memorial Hospital
of Harvard University at the
Massachusetts General Hospital
Boston, Massachusetts*

ACADEMIC PRESS
New York and London

CONTENTS

Foreword to the First Edition	v
Preface to the Second Edition	vii
Preface to the First Edition	ix
Introduction	xvii

I

Organic Chemistry and Biochemistry

1. Hydrocarbons as Parent Substances	1
2. Functional Groups	4
3. Polymeric Compounds	13
4. Isomerisms	13
5. Reactions with Biochemical Significance	18
Bibliography	19

II

Amino Acids

1. Chemical Properties	20
2. Individual Amino Acids	24
3. Separation of Amino Acids	30
Bibliography	33

III

Peptides

1. Structure and Nomenclature	34
2. Determination of Amino Acid Sequence in Peptides	35
3. Naturally Occurring Peptides	37
Bibliography	41

IV

Proteins

1. Structure of Proteins.....	42
2. Primary Structure.....	43
3. Secondary Structure.....	45
4. Tertiary Structure and Denaturation.....	50
5. Molecular Weights of Proteins.....	54
6. Colloidal Nature of Proteins.....	56
7. Purification and Check of Purity.....	58
8. Classification of Globular Proteins.....	60
X 9. Plasma Proteins.....	61
Bibliography.....	67

V

Enzymes and Biocatalysis

1. Chemical Nature of Enzymes.....	68
2. Chemical Equilibria and Chemical Energetics.....	69
3. Catalysts and Enzymes.....	72
4. Dynamic Equilibrium and the Steady State.....	73
5. Energetic Coupling and Energy-Rich Compounds.....	74
6. Specificity of Enzyme Catalysis.....	77
7. Michaelis' Theory.....	79
8. The Mechanism of Enzyme Catalysis.....	81
9. Conditions for Enzyme Activity.....	X 84
10. Classification and Nomenclature of Enzymes.....	85
Bibliography.....	89

VI

Coenzymes

1. Coenzymes and Prosthetic Groups.....	90
2. Coenzymes and Vitamins.....	92
3. Structure and Classification of Coenzymes.....	92
4. Coenzymes of the Oxidoreductases.....	94
5. Group-Transferring Coenzymes.....	100
6. Coenzymes of Lyases, Isomerases, and Ligases.....	113
Bibliography.....	114

X**Biologic Oxidation—Metabolism of Oxygen**

1. Combustion and Biologic Oxidation	187
2. Oxidation as a Loss of Electrons	188
3. The Redox Potential	190
4. The Respiratory Chain	192
5. The Electron-Transport Particles	198
6. Oxidative Phosphorylation (Respiratory Chain Phosphorylation)	199
7. Other Oxygen-Activating Enzymes	201
Bibliography	204

XI**Carbon Dioxide Formation in the Citrate Cycle**

1. Significance of the Citrate Cycle	205
2. The Individual Steps	207
3. Energy Yield of the Citrate Cycle	209
4. Relations to Synthetic Tasks. Glyoxylate Cycle	210
Bibliography	211

XII**Fats and Fat Metabolism**

1. Chemical Composition of Fats	212
2. Fats as Depot Material	215
3. β -Oxidation of Fatty Acids	216
4. Formation of Acetoacetate—"Ketogenesis"	219
5. Metabolism of Branched-Chain Fatty Acids	220
6. Biosynthesis of Fatty Acids	222
Bibliography	224

XIII**Phosphatides, Cerebrosides, Gangliosides**

1. Occurrence and Classification	225
2. Glycerophosphatides	226
3. Biosynthesis and Degradation of Glycerophosphatides	229
4. Sphingolipids	231
Bibliography	234

XVII**Glycosides, Oligosaccharides, Polysaccharides**

1. The Glycoside Bond.....	294
2. Disaccharides.....	296
3. Enzymic Cleavage of Oligosaccharides.....	298
4. Biosynthesis of Glycosides and Oligosaccharides.....	299
5. Polysaccharides: Homoglycanes.....	303
6. Enzymic Breakdown of Polysaccharides.....	306
7. Mucopolysaccharides.....	311
Bibliography.....	314

XVIII**Correlations in Intermediary Metabolism**

1. Metabolism of Carbohydrates.....	315
2. Metabolism of Fatty Acids.....	317
3. Citrate Cycle and Respiratory Chain.....	318
4. Metabolism of Proteins.....	320
5. The Common Pool of Intermediary Metabolism.....	321
Bibliography.....	322

XIX**Topochemistry of the Cell**

1. The Nucleus of the Cell.....	323
2. The Endoplasmic Reticulum.....	324
3. Mitochondria.....	328
4. The Cytoplasm.....	330
5. Significance of the Compartments.....	331
Bibliography.....	331

XX**Hormones**

1. Principle of Hormonal Regulation.....	332
2. Adrenocortical Hormones.....	335
3. Gonadal Hormones.....	338
4. Thyroid Hormones.....	340
5. Hormones of the Adrenal Medulla.....	343
6. The Hormone of the Pineal Gland.....	344

7. The Parathyroid Hormone.....	344
8. The Pancreatic Hormones.....	345
9. Hypophyseal Hormones.....	346
10. Hormonal Regulation of Blood Glucose.....	350
11. Hormonal Control of the Menstrual Cycle.....	353
12. Tissue Hormones.....	355
13. Hormones of Invertebrates.....	357
14. Pheromones.....	358
15. Growth Substances of Plants.....	358
Bibliography.....	359

XXI

Mineral Metabolism

1. Water Balance.....	360
2. Water as Solvent.....	362
3. Active Transport.....	367
4. Acid-Base Equilibrium.....	368
5. Metabolism of Alkali and of Chloride.....	370
6. Calcium and Phosphate Metabolism.....	371
7. Iron and Zinc.....	372
Bibliography.....	373

XXII

Nutrition and Vitamins

1. Caloric Value and ATP Yield.....	374
2. Essential Food Components.....	376
3. Vitamins.....	377
4. Fat-Soluble Vitamins.....	378
5. Water-Soluble Vitamins.....	381
Bibliography.....	383

XXIII

Special Biochemical Functions of Certain Organs

1. The Digestive Tract.....	384
2. The Liver.....	385
3. Blood.....	386
4. Kidney and Urine.....	387
5. Other Excretion Products.....	389
