GO TO THE HEAD OF THE CLASS WITH

Lippincott's Illustrated Reviews: Biochemistry, Second Edition

Lippincott's Illustrated Reviews: Biochemistry enables rapid review and assimilation of large amounts of complex information about the essentials of medical biochemistry. These outstanding features make this text helpful:

- ✓ **Outline Format Text** — Important topics are shown in bold print and enzyme names in italics, making it easy for you to find what you're looking for and to quickly understand relationships between concepts.
- ✓ **Illustrations** — Over 500 carefully crafted illustrations bring biochemistry alive for you.
- ✓ **Cross-References** — The cross-references to Harvey and Champe's *Lippincott's Illustrated Reviews: Pharmacology* allow you to readily learn additional information about a particular topic without having to search for the material.
- ✓ **Questions and Answers** — Practice is the key to success! Test your mastery of the material with more than 250 practice questions. Explanations accompany the answers so you'll learn "why" and not just "what."

Students who are preparing for standard courses or examinations (USMLE, FLEX, ECFMG, FMGEM) will find this remarkable work "must" reading to master biochemistry essentials.

ISBN 0-397-51091-8

9 780397 510917

Brief Contents

UNIT I: Protein Structure and Function

- Chapter 1: Amino Acids **1**
 Chapter 2: Structure of Proteins **13**
 Chapter 3: Globular and Fibrous Proteins **25**
 Chapter 4: Enzymes **47**
-

UNIT II: Intermediary Metabolism

- Chapter 5: Bioenergetics and Oxidative Phosphorylation **61**
 Chapter 6: Basic Concepts of Metabolism **75**
 Chapter 7: Glycolysis **87**
 Chapter 8: Gluconeogenesis **99**
 Chapter 9: Citric Acid Cycle **105**
 Chapter 10: Hexose Monophosphate Pathway **111**
-

UNIT III: Carbohydrate Metabolism

- Chapter 11: Structure of Carbohydrates **119**
 Chapter 12: Metabolism of Monosaccharides and Disaccharides **127**
 Chapter 13: Glycogen Metabolism **135**
 Chapter 14: Glycosaminoglycans **147**
 Chapter 15: Glycoproteins **157**
-

UNIT IV: Lipid Metabolism

- Chapter 16: Metabolism of Dietary Lipids **163**
 Chapter 17: Fatty Acid and Triacylglycerol Metabolism **171**
 Chapter 18: Phospholipid Metabolism **191**
 Chapter 19: Glycolipid Metabolism **199**
 Chapter 20: Cholesterol and Steroid Metabolism **205**
-

UNIT V: Nitrogen Metabolism

- Chapter 21: Amino Acids: Disposal of Nitrogen **229**
 Chapter 22: Amino Acids: Metabolism of Carbon Skeletons **243**
 Chapter 23: Conversion of Amino Acids to Specialized Products **257**
-

UNIT VI: Integration of Metabolism

- Chapter 24: Metabolic Effects of Insulin and Glucagon **269**
 Chapter 25: Metabolism in the Well-Fed State **281**
 Chapter 26: Metabolism in Starvation, Diabetes Mellitus, and Injury **291**
 Chapter 27: Nutrition **303**
 Chapter 28: Vitamins **319**
-

UNIT VII: Storage and Expression of Genetic Information

- Chapter 29: Nucleotide Metabolism **343**
 Chapter 30: DNA Structure and Replication **357**
 Chapter 31: RNA Structure and Synthesis **377**
 Chapter 32: Protein Synthesis **389**
 Chapter 33: Molecular Basis of Inherited Disease **401**
-

Index **421**
