

BM 57

S. D. WAINWRIGHT

Control mechanisms & protein synthesis

COLUMBIA UNIVERSITY PRESS

New York and London 1972

11326 / 114326 (51000)

07 OCT. 1980

CONTENTS

CHAPTER 1: Introduction: The System Regulated	1
CHAPTER 2: Nuclear and Chromosome Differentiation, Gene Amplification, and Cell Cycles	51
CHAPTER 3: Induced Enzyme Synthesis	77
CHAPTER 4: Enzyme Repression, Catabolite Repression, Transient Repression, and Immunity in Lysogenic Bacteria	135
CHAPTER 5: Messenger RNA and Gene Transcription in Procaryotes	181
CHAPTER 6: Gene Transcription as a Factor in Regulatory Mechanisms of Metazoans	234
CHAPTER 7: Regulation of Gene Transcription in Metazoans	272
CHAPTER 8: Transcription and Selective Extranuclear Transmission of Genetic Information in Metazoans	310
CHAPTER 9: Post-transcriptional Control of Protein Synthesis	344
CHAPTER 10: Molecular Differentiation in Model Systems	393
CHAPTER 11: Some Aspects of Antibody Formation	427
CHAPTER 12: Addendum: Recent Developments	457
GLOSSARY	469
BIBLIOGRAPHY OF QUOTATIONS	472
BIBLIOGRAPHY	475
INDEX	539
